When it comes
to senior living
you have
choices.

You can choose your lifestyle,
your location and exactly
the care you or your
loved one may need.

Independent Living

For senior adults looking to maintain an active lifestyle without the hassle of home

maintenance, Buckner Villas offers two independent living options: spacious one-story villas or beautiful one and two-bedroom apartments.

Each provide access to the community's state-of-the-art amenities, including a wellness center, indoor pool, movie theater, dining room, café, card room, library, salon and spa.

Assisted Living

For senior adults who may need additional support with daily living activities, Buckner Villas offers two assisted living options: The

Meadows, a traditional setting, and The Grove, a budget-friendly alternative.

Both provide a comfortable home environment where help with needs such as medication management and assistance with daily living activities is readily available. Most assisted living residents maintain an active lifestyle through regular community activities and outings.

Memory Care

When memory impairment becomes a concern for daily living, Buckner Villas provides compassionate support at The Harbor, our certified memory care community. Staff here treat the varying levels of

memory impairment—including Alzheimer's and dementia—using a holistic, faith-based approach that encourages residents to connect with their past and enjoy the present.

Skilled and Long-term Nursing

When a loved one's care requires around-the-clock nursing supervision, Buckner Villas

provides personalized, compassionate care at The Campbell Center. Skilled nursing stays are also available here for short-term rehab needs, such as after a surgery or injury. Staff work with each resident and family member to create effective, thorough treatment plans.
